Re: SB184 and HB5262

To Whom It May Concern:

I am a US citizenship and resident of the Town of Lisbon, State of Connecticut. I come to you today to strongly speak out against the passage of the above bills both in the House and Senate, being proposed re: absentee voting. I am fully aware and understand the events that transpired with Covid 19 that served as the means for increased widespread voter fraud in the 2020 election in this State and across this country. The right to vote in our country is a God given right that has been taken away from We the People, for decades, as I have come to learn over the course of these past two years. As a matter of fact, I support a full forensic audit of all 50 states, as well as other measures, to restore voter confidence and integrity for future elections.

The above proposed bills serve as a means to continue to build in voter fraud for which we the good citizens of Connecticut and this country do not support. We are no longer in a pandemic and our absentee voting should not be changed. Absentee voting has its purpose for those who physically cannot make it to the polls due to being severely incapacitated as documented by a medical professional, or who will not be in the State of Connecticut on Election Day. Our election system in this State is already compromised and the passage of the above bills will only make it worse.

I will be following closely the actions that are taken by those currently serving at the State Capital on this matter.

Sincerely,

Michele Chamberlain, 197 Ross Hill Road, Lisbon, CT 06351
